Welcome to DoDTechipedia
The technological superiority of the American warfighter is essential to the defense of our nation. Maintaining this superiority remains a challenge but one element should be information agility. The generation of wikis, blogs, and web pages has changed the way our work force accesses information. As a means to address this agility, we have developed "DoDTechipedia."
We have developed DoDTechipedia to increase communication and collaboration among DoD scientists, engineers, and acquisition professionals, as well as operational warfighters, and ultimately academic and private sector partners. The goal is to break through existing stovepiped communication and coordination processes and allow researchers to collaborate directly with other researchers in related areas. DoDTechipedia will enable users to see and discuss the innovative technologies being developed throughout the DoD and also emerging technologies from the academic and private sectors. Greater collaboration will result in more rapid technology development and the discovery of innovative solutions to meet critical capability needs.

Discussion (Hide Discussion)
How should I interpret a country entry? Is it a US assessment of foreign country S&T advancement? Is it a republication of a country's own assessment? Is it a vetted republication of a country's own assessment?
My view is that it could be any of the above as long as it is so idemtified. One way to disseminate country advances would be to publish that country's own assessment and vet it through the WIKI and discussion features of this page

In general terms, a blog (a contraction of the term "Web log") is a Web site, usually maintained by an individual, with regular entries of commentary, descriptions of events, or other material. Entries are commonly displayed in reverse-chronological order.
Most blogs in the wiki are focused on a particular Technology Area and authored by an individual with a particular expertise or interest in that area.
Contents
Technology Area Blogs

DoDTechipedia is a wiki. This means that the web pages here are created and edited by people just like you. The below tutorials take you through many of the processes you will use when contributing to the wiki, so you can see how easy it is.
Note: If you want to practice editing a wiki page, please use the Sandbox.
For a full user guide on performing the functions outlined below, see User Guide PDF Document or User Guide Word Document.
Automated Tutorials
Running Tutorials
These tutorials have been developed using Abobe Flash CS3 with ActionScipt 2.0. They have been tested to work with Flash Player and add-on 9.x and higher. They may support Flash Player 8.x as well.
Additional QuickTime and Windows Media Player versions will be forthcoming.

Working at Commander Operational Test and Evaluation Force, I am trying to find any historical documents that would have been signed test results on the Waterborne Security System (WSS). These documents will be after 1988 but before 1992, The Test and Evaluation Identification Number (or) Test and Evaluation Master Plan number is 1332.
Any information, pls corresponde with me at burrowst@cotf.navy.milor 757 282-5546 ext 3136
